

### Stainless Steel Kitchen Sink Series

For a quick kitchen make over, the Sinor double bowl kitchen sink kit offers an all-in-one solution to meet your needs. The Sinor kitchen sink comes with the matching drains. The ADA compliant depth allows for wheelchair accessible installations. With convenient top mount installation, Sinor sinks can be dropped in and ready to go quickly and efficiently.

The kitchen is the most commonly remodeled room in the home, and the counter and sink are the most frequently replaced items. When it is time to choose a new sink for your kitchen, you have many choices, not only in the material and shape of the sink but the configuration as well. Most sink companies have an array of varying sizes, with single and double bowl sinks being the two most common configurations. Both have their positive and negative attributes that may make one a better fit for your kitchen. We will outline the differences between the below, so you can decide which one will work better in your space.

#### Safe & Environmental-Friendly

Overflowing of the kitchen sink is not only a nuisance but also a potential hazard. The 'Overflow Protection' which drains water safety out of the sink is a definite advantage to have in any modern kitchen.

# Kitchen Sink With Faucet

**PREMIUM SERIES**

## NANO GUN METAL UNDERMOUNT KITCHEN SINK WITH FAUCET

This kitchen sink is installed above counter top, Sinor Premium single bowl gives you the needed space for washing and stacking dishes. The gun metal nano finish ensures the sink goes with your home decor and washes clean with soapy water.

Kitchen Sink is designed for unparalleled resistance to impact and thermal shock – heat-resistant. The deep Single bowl sink can accommodate your largest kitchenware.

Our Kitchen set includes the sink, matching premium glass rinser, basket strainer, soap dispenser, cup & bottle washer & multi functional water fall kitchen sink tap. These products provide superior performance because of features such as scratch resistance and gun metal nano finish.

**Outside size:**

750mm (length) x 460mm (width) x 220mm (depth) ; R10 radius corners, Over-sized bowl will accommodate your largest roasting pans, baking sheet.

We put a lot of effort into manufacturing quality products that meet our customers' expectations. Our products are premium quality. We believe in quality assurance and excellent customer service. Buy with confidence and you will not regret your purchase.

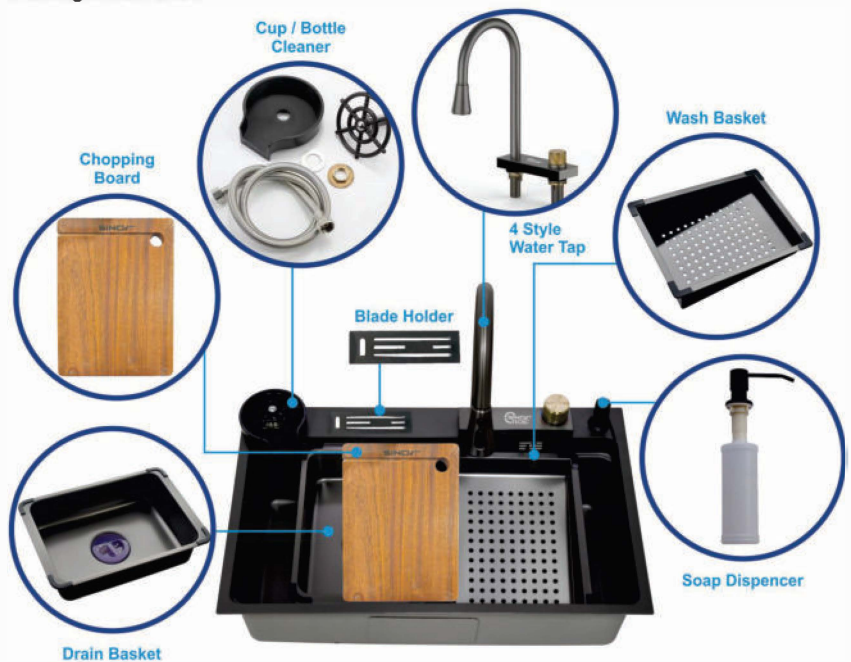

## 4 Style Water Tap

Say goodbye to the faucet single water mode

**Package Included:**

**Honeycomb embossed** core technology, self-contained nano antibacterial protective layer, effective antibacterial, escort for kitchen hygiene

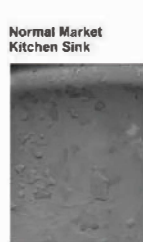

High-density embossed particles protect the surface of the sink, avoiding scratches and scratches

Nano antibacterial technology, dripping into beads, oil-resistant and easy to clean

**Honeycomb Embossed Kitchen Sink**

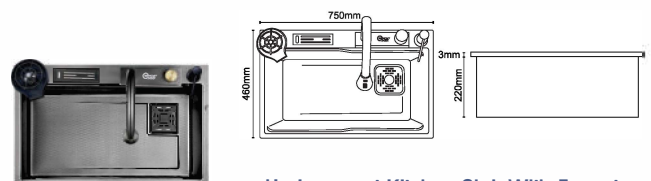

The oil stains are washed away by clear water, and the dripping water forms beads and falls naturally

**Normal Market Kitchen Sink**

Oil stains are always attached to the surface of the sink and cannot be easily washed away by clean water
